Maine's Workforce in 2019
October 17, 2019 - Economic conditions in much of Maine are favorable. The size of the economy and the number of jobs continue to reach new highs, driving unemployment and other measures of labor market slack to new lows. These tight labor market conditions provide a positive environment for individuals with high numbers of job openings and rising wages, but they are a challenge for employers, who are concerned about finding the staff they need. Separations will create openings even in occupations losing jobs.

Retirements and turnover create openings in all occupational groups. There will still be substantial numbers of openings in office and administrative support; sales; production; and transportation, despite the projected net decline in jobs. Similarly, the workforce in retail and food services is younger and turnover rates are high, leading to large numbers of job openings in those kinds of occupations.

The High-Wage In-Demand jobs page displays occupations with greater than 20 annual job openings and a median wage greater than the statewide median for all jobs.

Blank cells indicate that an estimate is not available. Certain estimates are suppressed from publication to meet confidentiality or data quality requirements. Wage estimates above the processing limits of the statistical software are also blank. Only annual wages are provided for teaching occupations and certain others, resulting in blank cells in the hourly wage type.
Note: Data for Maine (Statewide), the metropolitan areas of Bangor, Lewiston-Auburn, Portland-South Portland, Portsmouth NH-ME, Dover-Durham NH-ME, and the Balance of State Areas, are derived from the May 2015 Occupational Employment Statistics survey. County-level estimates are locally developed using the same OES methodology but have not been reviewed by the U.S. Bureau of Labor Statistics.

Blank cells indicate that an estimate is not available. Certain estimates are suppressed from publication to meet confidentiality or data quality requirements. Wage estimates above the processing limits of the statistical software are also blank. Only annual wages are provided for teaching occupations and certain others, resulting in blank cells in the hourly wage type.
Note: Data for Maine (Statewide), the metropolitan areas of Bangor, Lewiston-Auburn, Portland-South Portland, Portsmouth NH-ME, Dover-Durham NH-ME, and the Balance of State Areas, are derived from the May 2015 Occupational Employment Statistics survey. County-level estimates are locally developed using the same OES methodology but have not been reviewed by the U.S. Bureau of Labor Statistics.
